

Ecuador Gold

Treasures of the jungle!

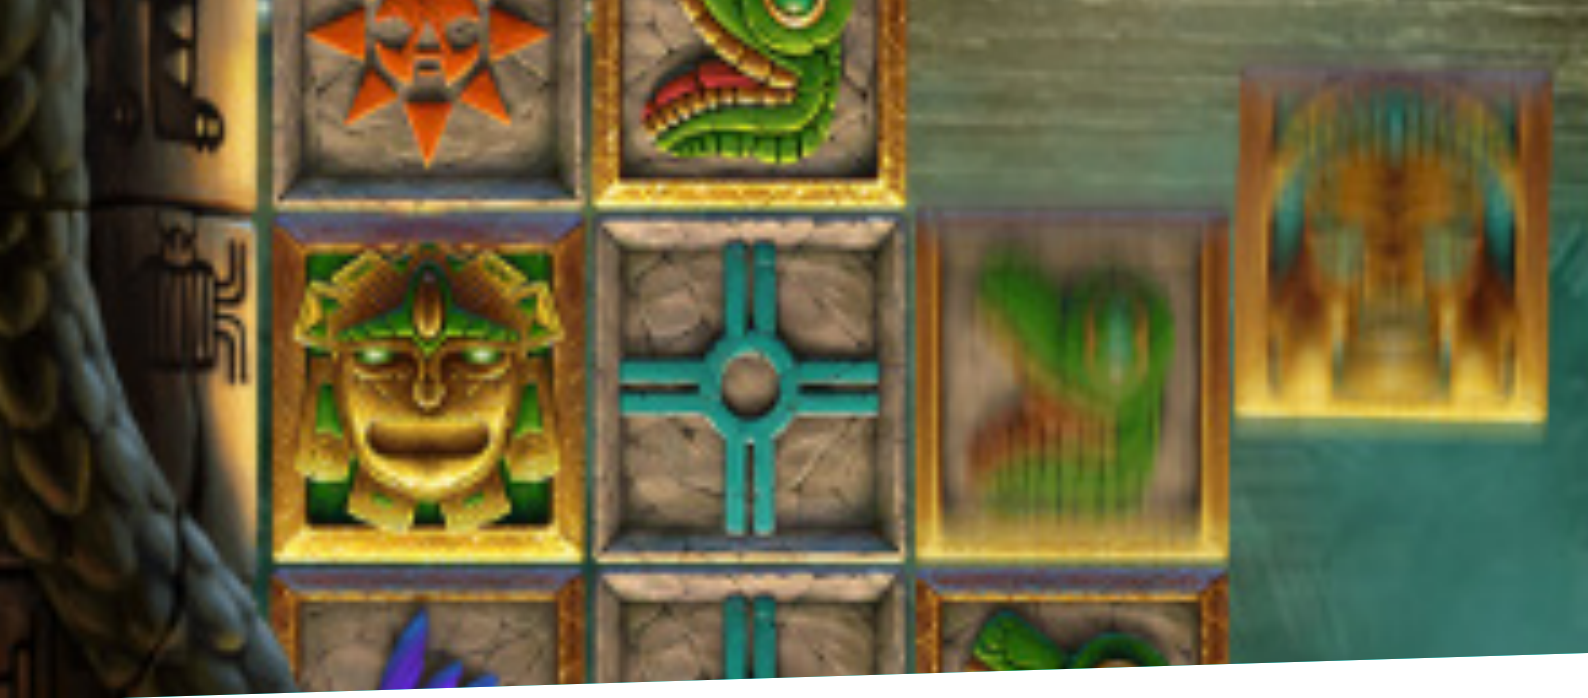

The lost Temple of Luck!

The South American rainforest becomes thicker and turns more and more into a jungle, and it gets dark since almost no light can pass through the dense vegetation. The blipping sound from the tracker in Kane's hand increases. It seems as if the locals were right, he had to force himself further in towards the distant mountains. Suddenly he can hear some waterfalls and the jungle open up in a glade, and yes – there it is! The lost Temple of Luck in all its glory.

Follow Kane into the temple and explore what treasures it holds!

Ecuador Gold is a beautiful and exciting slot with dropping symbols in 6 columns designed for Mobile First. It's highly appealing game mechanics and stunning visual effects keep the excitement and engagement level high for a long time, and its impressive to experience how the epic blocks generate flows of avalanches resulting in awesome wins.

The expansion of rows takes off at 4 rows and 4,096 ways to win and continues step by step up to breathtaking 8 rows and 262,144 ways to win. The maximum win is 250,000 coins. The Free Drops bonus game offers an exciting journey accompanied by tribal music and a feeling of endless avalanches of symbol piles reaching towards the sky.

The avalanching treasures

Heavy Incan blocks fall down on top of each other generating massive and decorative piles inside the treasure room. Winning combinations explode and give space for additional symbols to drop down from above and it feels as if the avalanches could keep on forever, generating win after win. The avalanches also add additional rows on top and increase the ways to win up to dizzying 8 rows and 262,144 ways to win.

You can really feel the weight of the super, mega and epic sized symbols as they clear away the smaller symbols on their way down and get the whole screen to shake as they finally land aside the firepit. A lucky hit of three bonus symbols make the sun and the moon to cooperate and finally open up the free drops.

Super, Mega and Epic symbols

All low, mid and high value symbols exist in four different sizes, ranging from standard 1x1, to super 2x2, to mega 3x3 and all the way up to massive epic 4x4. These big symbols are counted as containing the number of 1x1 symbol instances as it covers, e.g. epic 4x4 represents 16 standard symbols, resulting in numerous win combinations.

Ghosting Wild

The ghosting wild might appear in any symbol drop in the base game, and when it does it moves a random number of steps in any direction leaving wilds behind. It turns the complete super symbol into wild in case it come across such a big symbol, potentially resulting in generous wins.

Free Drops Bonus Game

Excitement increases as two bonus symbols appear in view and the symbols continue to fall down one by one. Fingers crossed, one additional bonus symbol showing up in the same symbol drop is enough to trigger the Free Drops Bonus Game. Three bonus symbols award 10 free drops, four bonus symbols award 15 free drops, five bonus award 20 free drops and a lucky hit of maximum 6 bonus symbols award 25 free drops. There is no end though, the Free Drops bonus game can be retriggered again and again and again.

The winning symbols explode and free up space for additional symbol drops and these avalanches can go on and on. One win in the free drop is enough to push the safety level upwards one row, which generates an even better starting position for the next free drop. The safety level can continue to advance upwards to the maximum 8th row, increasing the chances to win tremendously through the 262,144 ways to win. Luckily an achieved safety level never decreases during an ongoing Free Drops bonus game. During the Free Drop Bonus game all Wild symbols become indestructible, increasing the chances for an epic win!

Display modes

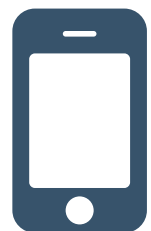

We believe people are different, and enjoy playing differently. Therefore when playing Ecuador Gold, the gaming experience is flawless regardless of what display mode is chosen. Functionality and icons are kept the same to ensure recognition between the different modes.

All ELK games are Mobile First and can be played on desktop as well as on mobile. Being Mobile First is essential since the smartphone is always accessible, and given the high level of hardware capabilities the gaming experience needs to be impressive.

Portrait mode

Portrait mode is ideal for people on the move. It brings some additional requirements in terms of one-handed access. All functions and settings are accessible by the usage of your thumb. The navigation in portrait mode is well thought through and focused on vertical movement and touch functionality.

All functionality is easy accessible and icons are kept the same to ease transition between different modes.

Landscape mode

All ELK games can be played in landscape mode. Navigation in landscape mode is focused on horizontal movement and touch functionality. All functionality is easy accessible and icons are kept the same to ease transition between the different modes. Simply turn your smartphone into your preferred mode.

Desktop mode

Mobile First is the core functionality, yet all ELK games are designed to provide an equally excellent gaming experience on desktop. The visual presentation is adjusted to suit the higher resolution a desktop usually provides.

General features

Betting strategies

All ELK games come with Betting strategies, which are highly appreciated by players worldwide. There are four unique strategies, which all apply to different type of gaming behavior. (*Read more about Betting strategies on the next page.*)

Auto Spin

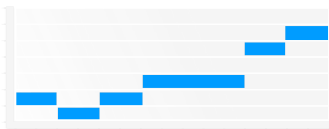

All ELK games support **Auto Spin**. Click the Auto Spin button or simply hold down the Spin button to activate the Auto Spin menu and choose the number of spins to run.

Options for Auto Spin may differ due to different regulations.

Betting Strategies

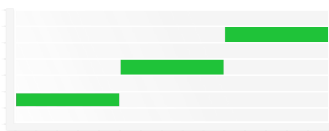

Many players change their bet size based on the outcome of previous spins. ELK has introduced a new way of playing casino games with the launch of Betting Strategies. A betting strategy is a predefined betting pattern that automatically changes the bet level depending on a chosen set of rules. A player can change or turn off the betting strategy after any spin. Betting Strategies work well in combination with Auto Spin.

Optimizer Bets a % of balance

The bet level will be changed automatically to a percentage of the player's balance. When the balance increases the bet level follows up automatically, and vice versa when the balance decreases.

From 1% (*casual player*) to 10% (*high roller*) of the bet balance.

Leveller Raise on 5 concurrent losses

The bet level will increase 2 steps after 5 concurrent losing rounds. After another 5 losing rounds the bet level will increase 2 more steps.

Bet levels will be reset to base level after a winning round.

Booster Raise on loss

The bet level will increase one step after every losing round until reaching 4 levels above base level (e.g. 10 times base level).

Bet levels will be reset to base level after a winning round.

Jumper Raise on win

The bet level will increase after every winning round until reaching 4 levels above base level (e.g. 10 times base level).

Bet levels will be reset to base level after a losing round.

Recommended size and ratio for desktop browsers

For the optimal gaming experience,
ELK Studios recommend launching
the game in 1600x900 resolution.
If scaling is required, use 16:9 ratio.

Technology

Our games uses state of the art
web technologies including support
for canvas and WebGL. The client
detects the capabilities of the
device regardless if the player
is running on a desktop, tablet
or mobile.

The game client will then optimize
the gaming experience based on
those parameters.

Mobile First!

ELK Studios

ELK is an innovative casino game studio placed in the heart of Stockholm. We develop casino and lottery games with a focus on new devices. Currently all our games are developed for Mobile First! All our games are of course also available on desktop and tablets.

Our games are developed and compiled in Sweden, and we use well known test centers such as Trisigma, Nmi and Gaming Associates to certify them. Once released, all games are operated by partners or operators who hold the license in each market.
