

Ice Wolf

Tame the dreaded predator

Welcome to the wolf's backyard

To reach the infamous Ice Wolf peak, one must cross an arctic landscape torn by chilling winds and eternal snow storms. Entering the territory of the Ice Wolf will make you realise you are not the alpha, but you can not allow doubt to stop you. Once you reach the base of the mountain, a challenging climb to the top begins. Can you invoke the help of your wolf guardian to shatter the hold of ice? If you make it to the top, abundant riches will warm your soul!

Ice Wolf is a traditional slot with modern features designed for Mobile First. Starting off at 6 reels and 3 rows, each consecutive win continues the expansion up to the maximum 7 rows. And not only that, reaching the top reel section could award additional spins, wilds and up to 50x multiplier on every win!

Getting all reel sections into play brings the ways to win all the way up to 74 088, which considerably increases the chance to win the maximum 250 000 coins.

The Ice Wolf is coming!

Ice Wolf reels

The Ice Wolf reels are divided into three sections; top, middle and bottom. The top and middle sections come into play once their ice is cleared away. A payline of three symbols is enough to start the ice shattering on the middle reel section bringing additional reel positions into play, and awards a respin. The more symbols included in the win combination, the more symbols will be cleared from ice on the reel sections above. Of course, the uncovered symbols contribute to the total win.

Reaching the top

Shattering the ice all the way to the top, brings the valuable top section on the 7th row into play. These reels might be sparse but they are only filled with goodies such as wilds, additional spin symbols and multipliers, which multiply the wins up to 50 times!

Multipliers and wilds are sticky throughout the whole game round once they hit on the top reel section. Active multipliers are additive and multiply the win regardless of which column they are in. The +1 Spin symbols remain sticky until they are used to prolong the respin sequence, increasing the chance for additional wins and by that further expansions.

Wolfpack

An Ice Wolf may appear in any spin. It triggers the whole Wolfpack to run towards the north. Shards of ice fly in every direction as the dreaded predators cross the spinning reel and leave a trail of wilds behind. The Wolfpack clears the whole column from ice and ensures it is fully in play as the reels stop. This ensures that the top reel is guaranteed to be brought into play. The Ice Wolf always awards a respin in case it would appear in a non-winning spin.

Display modes

We believe people are different, and enjoy playing differently. Therefore when playing Ice Wolf, the gaming experience is flawless regardless of what display mode is chosen. Functionality and icons are kept the same to ensure recognition between the different modes.

All ELK games are Mobile First and can be played on desktop as well as on mobile. Being Mobile First is essential since the smartphone is always accessible, and given the high level of hardware capabilities the gaming experience needs to be impressive.

Portrait mode

Portrait mode is ideal for people on the move. It brings some additional requirements in terms of one-handed access. All functions and settings are accessible by the usage of your thumb. The navigation in portrait mode is well thought through and focused on vertical movement and touch functionality.

All functionality is easy accessible and icons are kept the same to ease transition between different modes.

Landscape mode

All ELK games can be played in landscape mode. Navigation in landscape mode is focused on horizontal movement and touch functionality. All functionality is easy accessible and icons are kept the same to ease transition between the different modes. Simply turn your smartphone into your preferred mode.

Desktop mode

Mobile First is the core functionality, yet all ELK games are designed to provide an equally excellent gaming experience on desktop. The visual presentation is adjusted to suit the higher resolution a desktop usually provides.

General features

Betting strategies

All ELK games come with Betting strategies, which are highly appreciated by players worldwide. There are four unique strategies, which all apply to different type of gaming behavior. *(Read more about Betting strategies on the next page.)*

Auto Spin

All ELK games support **Auto Spin**. Click the Auto Spin button or simply hold down the Spin button to activate the Auto Spin menu and choose the number of spins to run.

Options for Auto Spin may differ due to different regulations.

Betting Strategies

Many players change their bet size based on the outcome of previous spins. ELK has introduced a new way of playing casino games with the launch of Betting Strategies. A betting strategy is a predefined betting pattern that automatically changes the bet level depending on a chosen set of rules. A player can change or turn off the betting strategy after any spin. Betting Strategies work well in combination with Auto Spin.

Optimizer Bets a % of balance

The bet level will be changed automatically to a percentage of the player's balance. When the balance increases the bet level follows up automatically, and vice versa when the balance decreases.

From 1% (*casual player*) to 10% (*high roller*) of the total bet balance.

Leveller Raise on 5 concurrent losses

The bet level will increase 2 steps after 5 concurrent losing rounds. After another 5 losing rounds the bet level will increase 2 more steps.

Bet levels will be reset to base level after a winning round.

Booster Raise on loss

The bet level will increase one step after every losing round until reaching 4 levels above base level (e.g. 10 times base level).

Bet levels will be reset to base level after a winning round.

Jumper Raise on win

The bet level will increase after every winning round until reaching 4 levels above base level (e.g. 10 times base level).

Bet levels will be reset to base level after a losing round.
